

- Project:** Airport Metro Connector 96<sup>th</sup> Street Station
- Agency:** Los Angeles County Metropolitan Transportation Authority
- Client:** Gruen Associates
- Soteria's Role:** Threat and Vulnerability Analysis and Resolution and System Safety and Security Planning and Certification
- Completion:** Scheduled for 2023

## Project Overview

This project is for a major transit hub that will connect the Metro Crenshaw/LAX and Green rail lines, area bus routes, and the LAX Automated People Mover.

The Aviation/96<sup>th</sup> Street Station will be a light-rail station on the Crenshaw/LAX line. This station will be a gateway to LAX and will provide the connection for passengers, employees, and visitors between LAX and the regional bus and rail transit system, minimizing the impact to airport facilities and surrounding communities. Project features include:

- Large-capacity light rail station
- Bus Plaza and terminal facility for Metro and municipal buses
- Secured bicycle parking
- Metro Customer Center
- Pedestrian Plaza with passenger pick-up and drop-off area
- Direct connection to the LAX Automatic People Mover, a project to which Soteria is also contributing

## Soteria's Contribution to This Project

Soteria Company developed the Threat and Vulnerability Analysis report and prepared graphics to support and communicate the security and crime data research findings. Soteria is actively working on the certification and audit process of the design conformance checklists and is also developing the construction conformance checklists and facilitating the certification process.
